In the G.O. first and second read above, Govt. have issued orders appointing Sri D. Bhaskara Rao, Member, Commissionerate of Inquiries, General Administration Department as Inquiry Officer to conduct departmental inquiry into the irregularities committed by certain officers in the works relating to "Improvements to Rudraiah Codu Drain from KM 0.00 to 4.50; KM 4.50 to 6.00 and KM 8.60 to 10.00. The Inquiry Officer has conducted the Inquires and submitted reports in his letters third and forth cited.

Government have examined the reports of Inquiry Officer in respect of reach "Improvements to Rudraiah Codu Drain from KM.0.00 to 4.50 and KM 4.50 to 6.00 and observed that the Inquiry Officer in his findings has stated that Charge is partly proved. The Charge states that excess measurements were recorded in two reaches to allow undue advantage to the contractors. The Inquiry Officer in his findings has stated that though excess measurements have been recorded, the excess quantity cannot be exactly quantified. The Enquiry Officer has mentioned that there is no satisfactory explanation for huge variation in quantities noticed by the inquiry team, based on which charges were framed. Also, the inquiry Officer has mentioned that it is also pertinent to note that the same quantities were arrived at by the CERP organization, which corroborates the findings of the team. If, that be the case, then excess measurements computed could be taken as reasonable and therefore, the Charge can be held as proved in toto.

Government have examined the report of Inquiry Officer in respect of reach Improvements to Rudraiah Codu drain from KM.8.60 to 10.00 and observed that the Inquiry Officer in his findings has stated that Charge-I is partly proved and charge-II not pressed in view of the findings in respect of charge-I. The charge-I which is the main charge stated that excess measurements were recorded to allow undue advantage to the contractor in connivance with each other. Charge-II speaks about the loss of Rs. 1.66 lakhs because of excess measurements. The Inquiry Officer in his findings stated that though excess measurements have been recorded, the excess quantity cannot be exactly quantified. The Inquiry Officer mentioned that there is no reason to doubt the authenticity of the pre-levels taken by the CERP unit. If, that is the case, then the excess measurements computed could be taken as reasonable and therefore, the Charge-II also can be held as proved.
